NOTE:

The lists of serial numbers of cameras and lenses are directly copied from the original documents at the Leica factory in Solms. The lists are handwritten and sometimes, especially in the older periods, the handwriting is very difficult to read, so an educated guess has been made occasionally.

There is much confusion among Leica aficionados over the exact interpretation of the lists. To be sure, they are neither production numbers nor sales numbers. In fact they are allocated serial numbers for future planned production. The year is the moment in time of the allocation, not necessary the year of production.

Not all ranges have been filled completely by real production targets. And sometimes a range that is not fully used has been given to special series.

If there are factual errors in these lists, I am to blame. These lists differ on many details with other published lists. I can only say that the numbers presented here have been collected from the original sources.

Erwin Puts, february 2010

Entrance Pupil position	54,8 mm (related to the first lens surface in light direction)	58.6 mm (related to the first lens surface in light direction)	32.3 mm (related to the first lens surface in light direction)	68 mm (related to the first lens surface in light direction)
Aperture	2.5 to 16	2 to 16	4 to 22	3.4 to 22
Number of blades				
Focusing Range	1 m to infinity	1 m to infinity	0.77 m to Infinity (with LEICA MACRO- ADAPTER-M: 0.5 to 0.76 m)	1.5 m to Infinity
Smallest object field 24 x 36 in mm	213x320	220x330	161 mm x 241 mm (with LEICA MACRO- ADAPTER-M: 72 x 108 mm)	220x330
Smallest object field 18x27 in mm	160x240			
Reproduction ratio	1:8.9	1:9	1:6.7 (with LEICA MACRO- ADAPTER-M: 1:3)	1:9
Filter	Non-rotating, internal thread for screw-on filters size E46	internal thread for screw-in type filters E 55	internal thread for screw-in type filters E 39, non-rotating lens mount	internal thread for screw-in type filters E 49

Name	Summilux-M 35 mm f/1.4 ASPH.		
	Floating Element		
Angle of View 24x36 d/h/v	63/54/37		
Angle of view 18x27 d/h/v	50/42/28(focal length equiv=47)		
Focal length	35.6		
Design: elements/groups	9 / 5		
Entrance Pupil position	16.6 mm (from apex of first lens element)		
Aperture	1.4 to 16		
Number of blades	9		
Focusing Range	0.7 m to infinity		
Smallest object field 24 x 36 in mm	418x626		
Smallest object field 18x27 in mm	313 x 470		
Reproduction ratio	1:17.4		
Filter	internal thread for screw-in type filters E 46		
Lens Hood	separate, snap-on type		
Length	46 mm		
Diameter	56 mm		
Weight	approx. 320 g		
Introduced	5/2010
